Objective

To expand my experience and expertise in software development, with an emphasis on user interface, interaction, and usability.

Professional Experience

iCentris
User Interface Architect 2005-Present
Employed skills in programming (JSP, Javascript/AJAX, CSS, XHTML), as well as graphical design (Photoshop, Illustrator), to create an enhanced user experience in a suite of tools targeted at Direct Sales and Multi-Level Marketing consultants.

Basic Research
Graphic Designer / Web Application Developer   2005-2006
Assisted in building a team to handle all customer-facing company websites, as well as development of ecommerce systems utilizing advanced Javascript, XSLT, and PHP. Worked with marketing department to bring a consistent look and feel to the web that was used also in print and packaging design.

Inspree, Blue Sky Ltd
Assistant Webmaster / Assistant to Head of Operations   2003-2004
Assisted in development and deployment of intranet structure and web presence.
Completed design and programming for websites for the company and affiliates.
Assisted with matters pertaining to receiving and managing customer payment in online transactions, including customer correspondence in relevant matters.

Additional Professional Activities

I employ the use of cutting edge technologies in a number of side projects - including the production of a social networking application written in Ruby on Rails. (Information located at http://royalants.com. Site is not currently active.)

Skills

Proficiency in the following computer languages, programs and operating systems:
Programming Languages: JSP, PHP, Ruby on Rails, HTML/XHTML, CSS, Javascript/AJAX - experience with common frameworks such as Prototype and jQuery
Design Applications: Adobe Creative Suite
Operating Systems: Mac OSX, Unix/Linux/BSD, Windows
